

Staff Education Tool:  
**Heart Failure: Telehealth System Monitoring**

Review assessment data transmitted to home care agency daily

- Weight
- Pulse
- Blood pressure
- Temperature
- Oxygen saturation
- Blood glucose
- Other data as collected
- Patient answers to questions about clinical condition, if used

If assessment data outside of expected parameters

- Initiate phone monitoring assessment (use **Phone Monitoring Assessment Guide**) or
- PRN home care visit (use **Cardio-Respiratory Assessment**) or
- Initiate actions (use **HF Decision Support Tool**)

If using video telemonitoring system

- Perform remote assessment
  - ✓ Auscultate heart and breath sounds
  - ✓ Blood pressure
  - ✓ Temperature
  - ✓ Other as indicated
- Use **Phone Monitoring Assessment Guide**
- Initiate actions as appropriate (use **HF Decision Support Tool**)
